

# McLAREN® PROTRAC™ FOR SKID STEER LOADERS

## The Industry's Most Advanced Over-The-Tire Tracks For Skid Steer Loaders

**Protrac** is the first and only skid steer track system to use pins and links made of heat-treated forged chromium-enriched steel alloy. This material features exceptional wear-resistance and guarantees extensive track life and low cost maintenance.

**PROTRAC™**  
series  
High Performance Skid Steer Tracks

Both Protrac Magnum and Protrac Rubber are fully rebuildable. You will never have to buy a whole track system again. Just replace the worn-out parts and you are back on the job for a fraction of the initial cost. Our E-Z four bolt system allows switching between Rubber and Magnum shoes to better fit your job requirements. Every element of Protrac is designed to save you time and money.

- Full Flotation • Maximum Traction • Tire Protection • Self Cleaning • No Tire to Track Slipping
- Less Ground Damage • Fully Rebuildable • Interchangeable Shoes • Less Skid Steer Bouncing

**Protrac** is built with manganese-enriched steel alloy, the type of tough alloy used in bucket teeth and other demanding applications. With its unmatched flotation, traction, and tire protection, Protrac is easy to install and inexpensive to maintain. There are three types available: **Protrac Diamond™** bites into mud, clay, loose rock, snow and ice like no other type of track. **Protrac Magnum™**, the toughest track on the market, has more pushing and pulling power, especially in deep mud, and sand or during demolition and land clearing. **Protrac Rubber™**, the most versatile track, has great traction and flotation, while its rubber shoes are gentle on turf and pavement to reduce damage to roads, sidewalks, driveways, gardens, and lawns.

**Dirt**

**Asphalt**

**Mud**

**The Right Tracks for Every Job**

# McLAREN® PROTRAC™ FOR SKID STEER LOADERS

## THE NEXT GENERATION OF SKID STEER TRACKS

With McLaren's new line of tracks for skid steer loaders you have the right tracks for any job. Protrac helps you where it counts the most: cross pavement without leaving a scratch, get out of a ditch with a fully loaded bucket, work in sand without sinking, push dirt uphill without sliding, and float over mud and snow with ease. We offer you three different types of Protrac so that you can choose the tracks that best suit your needs.

### Protrac Diamond™

**Aggressive Traction  
for Your Toughest Jobs**

## diamond

Efficient

#### UNIQUE TIRE CAVITY

Our tire-holding pad is designed to fit the skid steer tire to perfection providing maximum grip without slippage or damage to the tire. Protrac comes in three different sizes to fit 10", 12" and 14" wide tires.

#### PROTRAC Diamond™

##### AGGRESSIVE TRACTION FOR AGGRESSIVE JOBS

The diamond shaped crossbars prevent sliding of the skid steer even when driving sideways on a slope or working in wet or icy conditions. These tracks offer all the traction you'll ever need.

### Protrac Magnum™

**Go Where No Skid  
Steer Has Gone Before**

## magnum

Durable

#### MAGNUM SHOE

Protrac heat-treated Magnum shoes feature a defined directional lug pattern. These shoes are extremely durable and can handle the harshest ground conditions found at demolition and land-clearing sites. Tapered edges are designed for easy turning.

#### PROTRAC Magnum™

##### GO WHERE NO SKID STEER HAS GONE BEFORE

Consider this state-of-the-art track system. Protrac Magnum will protect your tires against punctures and provide your skid steer with the much needed flotation to go over sand, deep mud, and demolition debris. If you're looking for HEAVY-DUTY tracks to get you through the toughest jobs, these are your tracks.

### Protrac Rubber™

**The Ultimate  
Skid Steer Tracks**

## rubber

Versatile

#### RUBBER SHOE

Protrac heavy-duty rubber shoes are reinforced with steel plates. These shoes allow the skid steer to travel freely over hard finished surfaces such as concrete and asphalt without causing damage. Tapered edges are designed for quick and smooth turning.

#### PROTRAC Rubber™

##### THE ULTIMATE SKID STEER TRACKS

Durability, traction, flotation, tire protection, and yet they are safe on asphalt and sidewalks! There is simply no match for the convenience and versatility of Protrac Rubber. Once you install them on your machine, you'll never want to take these tracks off.

## Maximize Your Machine™
